Cooking project

The STEPS teachers wrote letters to certain organizations to help them with their cooking projects. These are fun Friday activities that incorporate the sound of the week (**SN**), teach students to follow directions and make some very interesting snacks.

Wegmans at Culver Ridge very kindly answered the call with gift cards to their supermarket. Shown below are Mrs. Horton/Mrs. Hirschler's STEPS class making **Snoopy's Snowy Snack Mix**.

PARENT'S CORNER

School 25 has 5 school goals

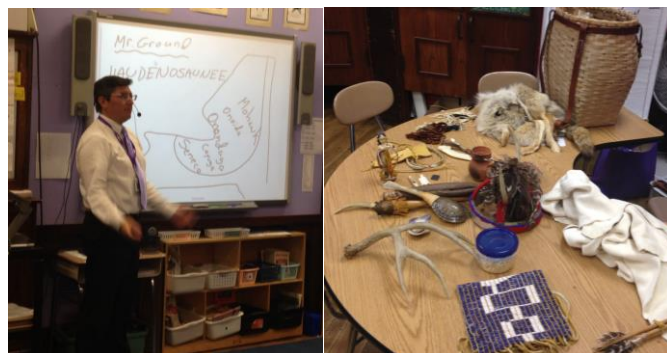

Each month we will feature one of these goals to familiarize you with them.

The third of these goals:

Improve ability to solve multi-step higher level mathematical word problems.

Also this month **Perry Ground** presented three different programs to the 4th grade students.

The first was a general program to learn more about the Haudenosaunee or Iroquois. Shown below are artifacts and pictures from this program. He then returned for two more popular programs. The students made corn-husk dolls in one and wampum in the other.

School 25 Newsletter – continued

Thanksgiving Dinner

On the Tuesday before the Thanksgiving break, the fourth and fifth grade teachers all chipped in with their own special Thanksgiving dish and provided their students with a great Turkey Day meal.

THINK

Think of all the things you are thankful for!

Especially this time of year, it is easy to think about the things we don't have or the things we want.

Try to take time to think about the things that you **do** have that make life worthwhile.
