

Every child is a work of art.
Create a masterpiece.

Coming Soon: School Flu Clinic

What: This winter our school will offer flu (influenza) vaccine for our students. There are two forms of flu vaccine – the nose spray and the shot. We will give most children the nose spray, which does not hurt. These are the same vaccines that your child’s doctor’s office gives.

Why: Getting the flu vaccine is the best way to prevent the flu.

When: Look for a **pink packet** in your child’s backpack later this fall. The clinic will be held in December or January during the school day. You will be notified 4 weeks before the clinic is scheduled with a specific date.

Where: The flu clinic will be held at school.
