

NAME: \_\_\_\_\_

Class Period: \_\_\_\_\_

## Lab 15 Where are different rock types found?

Look at the projected map for this lab!

### Procedure

*Color code the attached world map using colored pencils or crayons*

- Find out in which part of the world certain rock types are found by looking at the projected map.
- Answer the questions below after finishing the color coding. You may have to read the textbook or use the internet to figure out the answers!

### Conclusions

1. What type of rock is found below the oceans of the world? \_\_\_\_\_

How does it get there? (Explain):

\_\_\_\_\_

\_\_\_\_\_

2. Where are sedimentary rocks found? \_\_\_\_\_ How can you explain this?:

\_\_\_\_\_

\_\_\_\_\_

3. Where are igneous and metamorphic rocks found? \_\_\_\_\_ Try to find an explanation for this:

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

4. Are rocks distributed randomly or is there a pattern? Explain:

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_
