

# Upward Bound Math Science

The University of Rochester Upward Bound Programs prepares first-generation and/or low-income high school students from the Rochester City School District (RCSD) to apply and gain admission to college. We support students by providing tutoring after school, college visits, and monthly Program Days focused on career and cultural exposure. In addition to the school year, we also host a 6 week summer program.

At Joseph C. Wilson Magnet High School we offer the Upward Bound Math/Science Program that supports students in grades 9-12. Students are welcome to apply each spring.

For further information about program services and eligibility, please visit our website by following the link.
