Follow the links from there.</p> <p>classroom.google.com</p> <p>Science 7 major understandings for the week of 4/27-5/1:</p> <ul style="list-style-type: none">• Rocks are composed of minerals. Only a few rock-forming minerals make up most of the rocks on Earth. Minerals are identified on the basis of physical properties such as streak, hardness, and reaction to acid.• Fossils are usually found in sedimentary rocks. Fossils can be used to study past climates and environments.• Rocks are classified according to their method of formation. The three classes of rocks are sedimentary, metamorphic, and igneous. Most rocks show characteristics that give clues to their environment of formation.• The rock cycle model shows how types of rock materials may be transformed from one type of rock to another.	<p>Assignments for the week of 4/27-5/1 will be due 5/4</p> <p>For Help: Email Mr. Zebelman @ 2009097@rcsdk12.org or message me on Google Classroom 2009097@rcsd121.org</p>
