

4th Grade March Calendar & Newsletter

Expedition Update

Scientists have been enthusiastically investigating the scientific method and designing experiments to test simple machines. We look forward to exhibition night where families and the community will participate in our DWCA Science Fair and learn from all our experts! Our writing focus is on writing an opinion piece defending which simple machine we feels is the most useful.

Math Concepts

Scholars build on their Grade 3 work with unit fractions as they explore fraction equivalence and extend this understanding to mixed numbers. This will lead to the comparison of fractions and mixed numbers and the representation of both in a variety of models. Benchmark fractions will play an important part as well. Students then have the opportunity to apply what they know to be true for whole number operations to the new concepts of fraction and mixed number operations.

March 2016				
Mon.	Tues.	Wed.	Thur.	Fri.
	1 P.E	2 music	3 P.E	4 Art/library
