

Crash Course #5—Sensation & Perception

1. What is prosopagnosia?
2. What is sensation?
3. What is perception?
4. What is the absolute threshold of sensation?
5. What factors affect sensation detection?
6. What is signal detection theory?
7. What is sensory adaptation?
8. What is the difference threshold?
9. What is Weber's Law?
10. How do rods help your sense of vision?

11. How do cones help your vision?

12. What is the Young-Helmholtz Trichromatic Theory?

13. What is the Opponent Process Theory?

14. What is the process in your brain that allows you to see?

15. What are feature detectors?

16. What is parallel processing?

Topics covered in the video	Sensation vs. Perception
	Sense thresholds
	Neurology of vision
