Work Experience Program at James P. B. Duffy School #12

About Us...

Our Work Experience Program teaches students appropriate work habits and skills for employment in the food service trade, focusing on food safety and sanitation, equipment safety, cooking skills, food production, inventory management, and ordering. This particular program is designed to prepare High School students for the world of work in the restaurant/hospitality industry. We would be happy to serve customers from both the City School District and the community at large.
