## Addition (or Subtraction) with Cards

Materials: 2 sets of numeral cards 0–10

- Shuffle the cards and place them face down between the two players.
- Each partner flips over two cards and adds them together or subtracts the smaller number from the larger one.
- The partner with the largest sum or smallest difference keeps the cards played by both players in that round.
- If the differences are equal, the cards are set aside and the winner of the next round keeps the cards from both rounds.
- The player with the most cards at the end of the game wins.

## Sprint

Materials: Sprint (Sides A and B)

- Do as many problems on Side A as you can in one minute. Then, try to see if you can improve your score by answering even more of the problems on Side B in a minute.

## Target Practice

Materials: 1 die

- Choose a target number to practice (e.g., 10).
- Roll the die and say the other number needed to hit the target. For example, if you roll 6, say 4, because 6 and 4 make ten.

## Shake Those Disks

Materials: Pennies

The amount of pennies needed depends on the number being practiced. For example, if you are practicing sums for 10, you will need 10 pennies.

- Shake your pennies and drop them on the table.
- Say two addition sentences that add together the heads and tails. (For example, if you see 7 heads and 3 tails, you would say  $7 + 3 = 10$  and  $3 + 7 = 10$ .)
- Challenge: Say four addition sentences instead of two. (For example,  $10 = 7 + 3$ ,  $10 = 3 + 7$ ,  $7 + 3 = 10$ , and  $3 + 7 = 10$ .)

## Race and Roll Addition (or Subtraction)

Materials: 1 Die

- Both players start at 0.
- They each roll a die say a number sentence adding the number rolled to their total. (For example, if a player's first roll is 5, the player says  $0 + 5 = 5$ .)
- They continue rapidly rolling and saying number sentences until someone gets to 20 without going over. (For example, if a player is at 18 and rolls 5, the player would continue rolling until she gets a 2.)
- The first player to 20 wins.
