DO NOW

Name _____

Date _____ Per _____

- (1) Why is it important in life to know when things are parallel?
- (2) When do we use the term "parallel" when we are not talking about math?

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Announcements

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Assignment sheet

Class _____ Period _____

DATE	CLASSWORK ASSIGNMENT	HOMework ASSIGNMENT
9/24	Test Review, Unit 1 work Perfection	Unit 1 Summary

	<u>due</u> 9/28	<u>due</u> 10/1

10/1 Parallel Lines Problem Solving 9/28 Parallel lines Problem Solving 10/1

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 HW Check and Questions

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Parallel Exploration

CLASSWORK: Parallel Lines, Transversals, and Angle Relationships

Parallel: How can we be sure that lines are parallel? By demonstration? By construction? By graph?

Example: Because they are in the same plane and are always the same distance apart and never intersect, lines l and m are parallel. We show that lines are parallel by marking them with arrows or carots \wedge .

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Parallel Exploration

Explore Parallel Lines:

- a. Trace line AB on tracing paper. Slide the tracing paper and make a copy of line AB below the original – try to make it parallel. Label the copy A'B'.

Line AB:

Copy:

- b. Are you absolutely certain that the copy you made is parallel to line AB? Justify why or why not.

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Parallel Exploration

e. When you slid the copy down, the angles also were copied. $\angle 1$ became \angle ____ so we can say \angle ____ \cong \angle ____

$\angle 1$ became \angle ____ so we can say \angle ____ \cong \angle ____

$\angle 2$ became \angle ____ so we can say \angle ____ \cong \angle ____

$\angle 3$ became \angle ____ so we can say \angle ____ \cong \angle ____

$\angle 4$ became \angle ____ so we can say \angle ____ \cong \angle ____

f. These angle pairs are called **corresponding angles** because they are in the same relative location with respect to the transversal. They are congruent when formed by parallel lines and a transversal.

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Parallel Exploration

CLASSWORK: Parallel Lines, Transversals, and Angle Relationships

- g. What if your paper turns and AB and $A'B'$ are not parallel? Are corresponding angles still congruent? Justify why or why not.

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Parallel Exploration

h. What are all of the pairs of angles that are congruent because a transversal intersects 2 parallel lines?

i. Besides angles that are congruent, there are pairs of supplementary angles. Which pairs are supplementary?

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Parallel Exploration

CLASSWORK: Problem Solving with Parallel Lines

Find each angle measure.

3. $m\angle ABC$

4. $m\angle RST$

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Parallel Exploration

11. $m\angle WXZ$

12. $m\angle ABC$

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines

9/27 Parallel Exploration

CLASSWORK: Problem Solving with Parallel Lines

For each diagram:

IDENTIFY the relationship. Match the relationships below to the diagrams.

Complementary

Corresponding

Alternate Interior

Alternate Exterior

Supplementary

Vertical

Same Side Interior

WRITE an equation for pairs that are complementary or supplementary

SOLVE the equation & find the measure of the angle

SLO: I can identify and name parallel lines and angle relationships involving parallel lines and use the angle relationships to write and solve equations.

NYS Standard: **G.G.35** Determine if two lines cut by a transversal are parallel, based on the measure of given pairs of angles formed by the transversal and the lines
