

SLO: I can write conditional statements in a flowchart format and include reasons for each hypothesis and conclusion.

😊😊😊😊 Today is a GREAT day to think mathematically! Let's get organized first. 😊😊😊😊

TABLE OF CONTENTS: **11/9 Flowchart reasoning**

NEW NOTEBOOK PAGE: **11/9 Flowchart reasoning – Name**
SLO: I can write conditional statements in a flowchart format and include reasons for each hypothesis and conclusion.

Assignment Sheet: **11/9 CW: Flowchart reasoning Due 11/9**
11/9 HW: Flowchart reasoning Due 11/12

DO NOW SHEET: **Name, Date, Period,**
Write a conjunction that is true and a disjunction that is false.

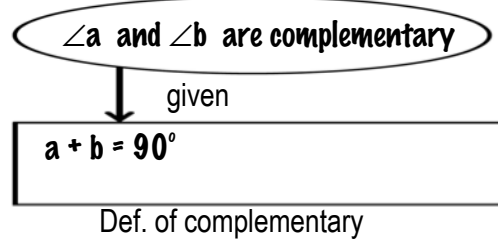

LESSON: (Record all work in your notebook.)

Notes (Copy into your notebook and draw a box around them)

Vocabulary: Flowchart: representation of a logical argument with statements and reasons.

Example: If $\angle a$ and $\angle b$ are complementary then $a + b = 90^\circ$.

Use the reasons below to complete the flowcharts for the conditional statements on the back of this sheet.

- | | | |
|-------------------------------|------------------------------|--|
| Given | Definition of congruent | Alternate Interior Angles Theorem (& converse) |
| Definition of supplementary | Definition of right angle | Alternate Exterior Angles Theorem (& converse) |
| Definition of complementary | Definition of straight angle | Corresponding Angles Postulate (& converse) |
| Definition of vertical angles | Pythagorean Theorem | Consecutive Interior Angles Theorem |
| Definition of midpoint | Midpoint formula | (& converse) |
| Definition of bisect | | |

HOMEWORK: Problems under "Friday 11/9" on the homework sheet.

EXIT BACK OF DO NOW SHEET: Today my level of understanding is 😊😊😊 because _____
 Write a flowchart for: If $\angle a \cong \angle b$, then $m\angle a = m\angle b$

SLO: I can write conditional statements in a flowchart format and include reasons for each hypothesis and conclusion.

1. If $n \parallel p$, then $\angle a \cong \angle b$.

○
↓
□

2. If $\angle c$ is supplementary to $\angle d$ then $c + d = 180^\circ$.

○
↓
□

3. If $\angle e \cong \angle f$, then $n \parallel p$.

○
↓
□

4. If G is the midpoint of \overline{HI} , then $HG \cong GI$.

○
↓
□

5. If $\angle j$ is vertical to $\angle k$, then $m\angle j = m\angle k$.

○
↓
□

6. If $\angle m$ is a right angle then $m\angle m$ is 90° .

○
↓
□

7. If $n \parallel p$, then $\angle s \cong \angle r$.

○
↓
□

8. If a right triangle has legs a and b and hypotenuse c , then $a^2 + b^2 = c^2$

○
↓
□

9. If $n \parallel p$, then _____.

○
↓
□

10. If $\angle v$ is a straight angle, then _____.

○
↓
□

11. If $\angle w \cong \angle x$, then _____.

○
↓
□

12. If \overline{YZ} bisects \overline{AB} at C, then _____.

○
↓
□

13. If $\overline{CD} \cong \overline{EF}$, then _____.

○
↓
□

14. If $m\angle G$ is 90° , then _____.

○
↓
□

15. If $n \parallel p$, then _____.

○
↓
□

16. If \overline{JK} has endpoints $J(3,7)$ and $K(-4,-3)$ then midpoint M has coordinates _____.

○
↓
□
