

7.5

Name (print first and last) _____ Per _____ Date: 3/6 due 3/7

7.5 Similarity: Write and solve proportions from figures

Geometry Regents 2013-2014 Ms. Lomac

SLO: I can write and solve proportions from figures.

Dilation (Notation D_k)	Segment	Length	Similar	Image
Coordinates	Direction	Congruent	Units	Original
Scale factor	Center of dilation	Origin	Proportional	Corresponding

(1) Sometimes it is hard to see overlapping triangles. Redrawing the triangles can be a helpful tool.

OVERLAPPING

REDRAW SEPARATELY

For the example below, redraw the triangles in the diagram. Label the vertices with their letters and the sides with their measurements.

In the figure below, $\triangle ABC \sim \triangle ADE$.

Find the value of x .

Write a proportion matching corresponding sides of each triangle.

$$\frac{BC}{DE} = \frac{AC}{AE}$$

$$\frac{x}{8} = \frac{2}{2+3}$$

$$(2+3)(x) = 8(2)$$

$$5x = 16$$

$$\frac{5x}{5} = \frac{16}{5}$$

$$x = 3.2$$

Find the cross products.

REDRAW SEPARATELY

(2) Use the example as a guide to help you solve the problems below. REDRAW the triangles separately, WRITE A PROPORTION with corresponding sides, and SOLVE the proportion for the variable(s).

(a) Find UW

(b) Find LB

7.5

□ (c) Find SG

□ (d) Find SC

□ (e) Find PR

□ (f) Given:

$$\begin{aligned} \Delta SWZ &\sim \Delta SXY \\ SW &= 15 & SZ &= 12 \\ WX &= 5 & WZ &= 9 \end{aligned}$$

Find: SY and XY

□ (g) Find NM

□ (h) Find AT
