

0 Basic Geom (N2)

Description:

A part of a line with two endpoints, the distance between which can be measured

Description:

Tools used to measure and copy distances and draw straight lines or segments

Description:

Diagrams that are precisely drawn with a compass and straightedge

Description:

A point on a line segment that is the same distance from one endpoint as it is from the other

Description:

A part of a line, sometimes called a "half-line," that has one endpoint and extends infinitely in one direction

Description:

A point that is at the end of a segment or ray

Description:

When the distance between a pair of points is the same as the distance between a different pair of points

0 Basic Geom (N2)
