

1 Construction (N7)	1 Construction (N7)	1 Construction (N7)	1 Construction (N7)
Description: A location in which the three angle bisectors of a triangle intersect	Description: A location in which the three angle bisectors of a triangle intersect	Description: A location in which the three angle bisectors of a triangle intersect	Description: A location in which the three angle bisectors of a triangle intersect
Description: A set of points that meet specific criteria	Description: A set of points that meet specific criteria	Description: A set of points that meet specific criteria	Description: A set of points that meet specific criteria
Description: A location in which the three medians of a triangle intersect	Description: A location in which the three medians of a triangle intersect	Description: A location in which the three medians of a triangle intersect	Description: A location in which the three medians of a triangle intersect
Description: When all sides of a figure are congruent and all angles of a figure are congruent (the figure must be composed of non-intersecting segments)	Description: When all sides of a figure are congruent and all angles of a figure are congruent (the figure must be composed of non-intersecting segments)	Description: When all sides of a figure are congruent and all angles of a figure are congruent (the figure must be composed of non-intersecting segments)	Description: When all sides of a figure are congruent and all angles of a figure are congruent (the figure must be composed of non-intersecting segments)
Description: A location in which the three perpendicular bisectors of the sides of a triangle intersect	Description: A location in which the three perpendicular bisectors of the sides of a triangle intersect	Description: A location in which the three perpendicular bisectors of the sides of a triangle intersect	Description: A location in which the three perpendicular bisectors of the sides of a triangle intersect
Description: A location in which 3 or more lines intersect	Description: A location in which 3 or more lines intersect	Description: A location in which 3 or more lines intersect	Description: A location in which 3 or more lines intersect
Description: A location in which 3 the three altitudes of a triangle intersect	Description: A location in which 3 the three altitudes of a triangle intersect	Description: A location in which 3 the three altitudes of a triangle intersect	Description: A location in which 3 the three altitudes of a triangle intersect
