

# 3 Keys to the Learning SUCCESS of Young Pre-K Children

## **1. School and Family Partnerships ☺**

Parents/families showing that they care about school and being involved make children more likely to value school themselves. Be involved and share the learning success of your young children! ☺

## **2. Read to your child ☺**

Encourage reading all the time: in your kitchen, at the store, in a magazine, reading labels, books that rhyme and also role modeling your own reading to your child.

## **3. Social and Emotional Growth ☺**

Encourage problem solving with words. Help children to be responsible in their daily routines at home. Support positive growing friendships.
