## Local Measures - Student Attendance Adjustment

Students' assessment scores will be given proportionate weight based upon their attendance pursuant to the following methodology:

Each student's assessment score $\left(\mathrm{A}_{\mathrm{s}}\right)$ shall be multiplied by the number of days that student was in attendance $\left(D_{a}\right)$, which shall be the gross student score for that student $\left(G_{s}\right)$. The sum of the gross scores all of the students in a teacher's cohort shall be the cohort score $\left(\mathrm{C}_{\mathrm{s}}\right)$, which shall be divided by the total number of days that all students within a teacher's cohort were in attendance for the assessment period $\left(\mathrm{T}_{\mathrm{a}}\right)$, which shall be the weighted score $\left(\mathrm{W}_{\mathrm{s}}\right)$ for that teacher.

For example:

| Student | Days in Attendance $\left(\mathbf{D}_{\mathbf{a}}\right)$ | Assessment Score $\left(\mathbf{A}_{\mathbf{s}}\right)$ | Gross Student Score <br> $\left(\mathbf{G}_{\mathbf{s}}=\mathbf{D}_{\mathbf{a}} \mathbf{x} \mathbf{A}_{\mathbf{s}}\right)$ |
| :--- | :--- | :--- | :--- |
| 1 | 175 | 98 | 17,150 |
| 2 | 100 | 94 | 9,400 |
| 3 | 75 | 72 | 5,400 |
| 4 | 50 | 50 | 2,500 |
| 5 | 150 | 86 | 12,900 |
| Total | $550\left(\mathrm{~T}_{\mathrm{a}}\right)$ | 400 | 47,350 |
| Average | $400 / 5=80 \%$ |  |  |
| Weighted <br> Score | 4, |  |  |
