

## Creating Pictures With Shapes!

Last class we used circles,  triangles,  and rectangles  to make birdhouses.

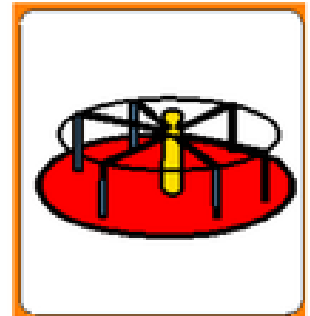

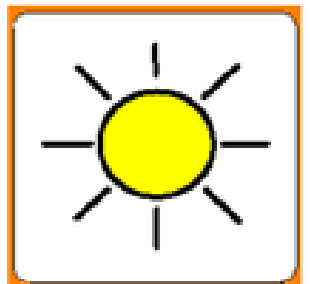

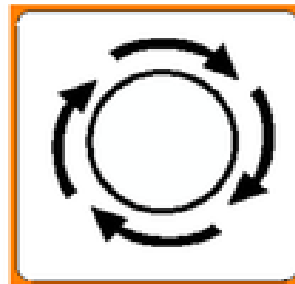

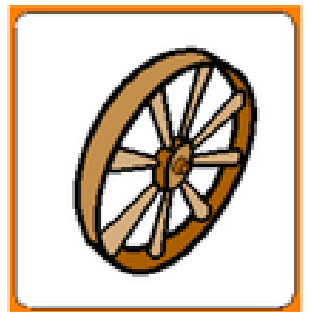

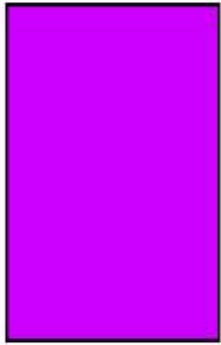

Today, we will practice making each of these shapes on some paper, or on the practice sheets listed under this assignment on the teacher page!

After we have practiced making these shapes, we will draw our own pictures using two of each of these shapes! You can draw anything you would like, but your picture must include at least two triangles,  Two circles,  and two rectangles  !

My example is below! There are also charts of these shapes on the next page if you would like to use them to help you think of things to put in your pictures that have these shapes!

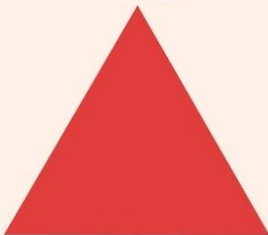

## Circles

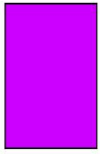

rectangle

## triangle

**Work Cited:** Below are the Links where I found images used in this assignment

rectangle
