### WHAT EVERY FAMILY MUST KNOW

Integrated Arts & Technology students want to be part of a collaborative learning school, in which students and staff work together in project-based learning activities. We have a variety of after-school activities, sports, and clubs to give students an opportunity to engage in school life beyond the classroom. Our school stresses the importance of family and community. Students receive the benefits of a small learning environment on a campus with all the facilities and amenities of a large high school.

### SCHOOL FEATURES

- Project-based learning using technology and the arts. State-of-the-art approach to teaching and learning utilizes current technology tools such as netbooks, iPads, Chromebooks, and digital tools.
- Requires a commitment to excellence by each student and parent. Our school is a community of learners based on respect, responsibility, high expectations, the ability to work with others, and a desire to be an active part of a focused learning environment.
- Students are engaged in two grade-level learning expeditions per year based on the State standards. The expeditions are based on topics that teach reading, writing, math, science, and social studies, and promote citizenship and character development.
