Public Hearings to Improve Receivership Schools

(Editors: The District is working hard to make sure all families of Receivership schools are aware of these meetings. Please help us by highlighting the attached schedule on your websites and in your coverage.)

Six school communities identified as Receivership schools by the New York State Education Department (NYSED) are conducting public hearings between August 29 and September 25, 2025. Under New York State law, Receivership schools must make significant gains in student achievement. During these hearings, schools will discuss the performance of each school and the general construct of Receivership. The public will be given the opportunity to provide comments and feedback during these hearings.
