We are opposed to the appointment of any charter school employees or affiliates to the board. Not only is this a conflict of interest, but the students and educators of the Rochester City School District deserve board members who trust and value PUBLIC education. Any affiliation with a charter school is a conflict of interest, and can only lead to the further privatization of our school district.</p> <p>These attacks go beyond the appointment of a single board member. Our newest Superintendent has hired charter school executives such as Dr. Kathleen Black, as our new Chief Academic Officer.</p> <p>We are also seeing gross inequity between what charter schools are able to offer, as they scoop up 6 times more CARES act funding than the RCSD was able to. Currently the students of the RCSD are being deprived of their right to a sound and basic education, while charter schools are able to offer in person schooling because they have access to funding that the RCSD does not.</p> <p>The writing is on the wall, the Rochester City School District, which serves 80% of the students of this city, is being defunded and dismantled. Charter schools are being handed cash and are expanding exponentially. Not only have charter schools been shown to show NO better performance than traditional public schools, but they are also contributing to the immediate starvation of the RCSD, with over 80 million dollars coming from the RCSD budget to charter schools last year alone.</p> <p>We demand a pro-public education replacement be chosen for the open board of education seat. We need someone who has shown a lifelong dedication to the success of public schools, and who has a vested interest in their continued success. Nothing else will be acceptable to the students, educators, and community members of the RCSD.</p>
