Syllabus for Economics Research Paper

Choose any nation within the world and write about the history of that nation to the present day. While you are writing you will mention new leader, wars, famines, depression, recessions, political turmoil, cultural changes, economic prosperity, etc. All of these changes that you will write about are a result of the economic productivity that has or has not taken place within the country of your choice. Also please give your opinion on the future outlook of your nation.

Unlike your public policy paper, this research paper is not an argumentative research paper. This research paper will be an expository research paper. It's an historical paper filled with facts that have changed the political and cultural landscape of your country. .

Examples: Great Britain, Canada, Mexico, Russia, China, France, Germany , Vietnam, Brazil, South Africa, Israel, Iran, etc.

Length: 10 pages (Minimum)

Sources: 4 or more books
2 to 3 Journal Articles
2 to 3 Newspaper Articles
2 to 3 Magazines Articles
2 Websites Maximum

MLA STYLE!!!!!!! Any Questions?

Your research paper is basically a historical analysis of your country over the last 100 years. This is a historical paper. Pretend that you are a history teacher and that you have to teach the history of your nation over the last 100 years to your students. **DETAIL is EVERYTHING!!!**

REMEMBER!!!!!!

Economics Systems: When things are going good: prosperity, people are happy, people are making and spending money. Government is stable.

When you have recessions and depressions sometimes governments are overthrown, countries go to war, and economics systems change. People and nations become desperate when there are no jobs, food, etc.
