

Name _____

Date _____

Relevant Vocabulary
Module 1 Lesson 1

Segment

The area of a circle made by a line and an arc.

Radius

The distance from the center to the edge of a circle

It is half of the circle's diameter.

Circle

A round figure where all points are the same distance from the center.

Equilateral Triangle

A triangle with all three sides of equal length.
All the angles will be 60 degrees.

Collinear

When three or more points lie on a straight line.

(Two points make a line so would always be collinear.)

Length of a Segment

The length of a line segment can be defined as the distance of the line between the end points
